

PRESS RELEASE

Creomagic to introduce CREOHUB: The Fortress of Network Connectivity for Tactical Units

Secure, Personal Radio Solution for Mission-Critical Applications

Enforce Tac, Germany, February 26-28, Hall 7A Booth 338e

Ness Ziona, Israel – February 22, 2024 – Creomagic Ltd., a global leader in Wireless Communication Solutions to showcase CreoHub —an advanced personal radio device that acts as a fortress of connectivity engineered to support secure, immune, and intelligent communication for tactical units engaged in modern warfare and complex security operations. CreoHub unique capabilities address the critical challenges of spectrum scarcity, electronic warfare, and seamless integration of autonomous systems within tactical frameworks. Creomagic will showcase CreoHub at Enforce Tac, Nurnberg, Germany, 26-28 February 2024.

In the rapidly evolving arenas of combat and security, the need for a resilient communication system to counter emerging threats has become increasingly crucial. CreoHub is a field-proven radio device for modern military operations ensuring uninterrupted, high-throughput wireless coverage for multidomain operations across land, air, and sea. CreoHub advanced radio capabilities establish secure and resilient networks ensuring robust connectivity even in the most contested and challenging environments.

“CreoHub encapsulates our vision for a seamless, secure, and intelligent communication ecosystem, specifically designed to meet the rigorous demands of tactical units,” remarks Alex Shapochnik, Creomagic Co-Founder and CEO. “It represents our relentless pursuit of innovation, providing tactical teams with a decisive edge in operational areas.”

Equipped with cutting-edge antennas technology, Cognitive-Radio methodologies, and powered by Artificial Intelligence, CreoHub secures a dominant position in the field by

ensuring uninterrupted connectivity and high data transfer rates under any condition. Its advanced waveform technology and adaptive networks are tailored to maintain operational continuity and resilience, proving indispensable for mission success.

Operational feedback from tactical experts underscores CreoHub's critical role in transforming tactical communication landscapes, presenting a new era of mission efficiency and security.

About Creomagic:

Creomagic develops and manufactures innovative communication solutions that form intelligent Mobile Ad-Hoc Networks (MANET), specifically designed for mission-critical and tactical operations. Our radio technology provides users with reliable, secure, and resilient connectivity for any mission. At the core of our solutions is CreoNet, a software-defined radio (SDR) technology developed by Creomagic that leverages world-leading capabilities, including advanced waveforms, machine learning, and networking technologies. Our solutions are engineered and fine-tuned by a highly experienced team, committed to the highest standards of innovation across our products and services.
